Main characteristics

Solid wood components
The Volt table is distinguished by its faceted cut legs and wood inserts that serve as grommets.

Connectivity in the apron
The connections integrated into the wood apron free up the work surface, and offer different types of connections.

Legs that conceal wires
An optional cut out in the wooden leg sealed with a zipper allows a seamless way to bring power to the surface.

High end finish
The look of the diamond legs is completed with a knife edge surface that can be finished with the ultra soft touch Monochrom HPL.
